About Me

Hi, my name's Brett and I'm a senior network system administrator. As well as administering systems I also have experience making software and web apps. I have worked at a number of companies gaining teamwork and leadership skills.

I am most skilled in: [AWS](#) and [Eating Pizza](#)

Projects

Super awesome project

github.com/sproogen

This is probably one of the greatest apps ever created, if you don't agree you're probably wrong.

I started this project as a way of learning [React](#) and it has since grown into a fully fledged app. I have learned many skills through this and been I'm very proud of having this in my portfolio. If you don't have a project as awesome as this I would advise you make one.

Experience

The Boring Company

Senior Network System Administrator

November 2017 - Present

boringcompany.com

*Solving 21st century problems by digging holes and making game changing products like the *not a flamethrower**

Every company needs its networks properly administered and The Boring Company is no exception. Digging holes is hard and I play my part making sure the whole company stays connected. I lead a team of 5 people and enjoy driving the company to try new technologies.

Education

Wrocław University of Science and Technology

BEng Computer Science

2015 - 2019

My engineering thesis project was a language learning mobile app. It used convolutional neural networks to construct a deck of flashcards out of photos of everyday objects.

A Little More About Me

Alongside my interests in networks and software engineering some of my other interests and hobbies are:

- Rock climbing
- Gaming
- Knitting
- [Becoming a ninja](#)
