

Julian Jurec

Software Consultant

Email: julian.jurec@gmail.com

Intro

I've worked as a software consultant since 2016. My role varied, from solely coding to business analysis to leadership. I've been involved in well over 20 projects of varying sizes, scopes, and domains over the years.

Jobs

Loomis Pay

Android developer (2023 - Now)

- Built Loomis Teller - a green-field payment facilitator app, connecting multiple payment providers with multiple integrations.
- Maintained beautiful partner integration documentation: RS232/USB, MDB, Local HTTP server, app2app, Cloud.
- Worked in PCI DSS compliant environment

Product Owner (2025 - Now)

- Owned Loomis Teller, made decisions, prioritised, externally represented the product
- Guided development team by managing backlog and communicating with stakeholders

DNA Technology

Software Consultant (2023 - Now)

- Worked with DNA's clients, growing the relationships while caring for DNA's internal environment.

Team Lead (2025 - Now)

- Facilitated growth and well-being for several team members

Applover

Android developer (2017 - 2023)

- Developed modern, maintainable, scalable green-field code.
- Supported and maintained massive legacy codebases.
- Supported numerous clients in design, implementation, and maintenance of their software products.
- Built processes and metrics to improve their way of work.

Android team lead (2019 - 2023)

- Helped grow Applover from ~10 to ~150 people
- Cared for a team of 5-10 in their growth and well-being
- Led recruitment
- Led org-wide tech decisions

Business analyst (2022 - 2023)

- Had sales meetings as a tech expert
- Defined business requirements, built processes in the clients' environments
- Estimated, audited, conducted market research

Software Development Academy

Coding teacher (2017 - 2019)

- Taught Java and Python classes in both Polish and English
- Conducted shell+git proficiency workshops
- Helped expand the offering to the Baltics by leading the way in the Estonian branch

GSM Billing Ltd.

Mobile developer (2016 - 2017)

- Developed internal tools for a British tele-comms company in a small cross-platform team

Projects

Loomis Teller

- Built green-field payment facilitator app, connecting multiple payment providers with multiple integrations: RS232, MDB, Local HTTP server and others.

Glovo

- Designed a cross-platform, dynamic, backend-driven, recursive support tree in a food delivery app

Bodycoach

- Ported design-award winning iOS app to Android with fully custom UI and animations.

Razer

- Worked on Razer Phone's official camer app. Performance-testing, low-level Android code, Canvas-based UI.

Plenty of Fish

- Led a total rebrand in a massive, legacy codebase with A/B-test-based staged rollout

Skills

Preferred Android tech stack:

- Kotlin, Coroutines, Flows, Room, Dagger/Hilt, Compose, MVVM, Clean arch.

Also Fluent in:

- Java, Python, JS, sh, most Android tools/patterns popular since 2015.
